PROJECT NOTICE – RFQ Schedule

**Missouri River Terminal (MRT) Project
Request for Qualifications, issued June 28, 2022**

Prospective Respondents are advised that, following subsequent discussions and coordination with the Office of Environmental Analysis (OEA) within the U.S. Surface Transportation Board (STB), Port KC has determined that responses to the RFQ will be best tailored to the requirements of the Project following further completion of the NEPA process, anticipated to occur in the Fall of 2022.

Accordingly, Port KC has paused collection of SOQs and anticipates issuing an addendum to this RFQ following further advancement of the STB's NEPA process.

Prospective Respondents need *not* submit SOQs by the present submission date of August 15, 2022. SOQs are not required, nor should be submitted, until the date set forth in the addendum to be issued.

This addendum shall update the Project specifications as well as submission requirements set forth in the RFQ as may be necessitated and set forth a revised procurement schedule within such addendum.
